

ExoFlowMetry 2019

The First International Workshop on Exotic Flow CytoMetry

Checking small things... better!

ROME 13th - 15th NOVEMBER 2019

13th - 14th ENEA Casaccia Research Centre - 15th Istituto Superiore di Sanita' ISS

The potential of flow cytometry (FC) is still largely unexpressed in areas different than the clinical and biomedical applications, for which is widely applied since the '60s of the last century. High processivity, multiparametric and analytical precision are typical features for FC, all well suited to different and unconventional (exotic) applications. During last years, there has been a significant technological progress in FC and a number of new instruments have been, and are going to be, released to the market or developed as prototypes. New fields of application such as winemaking, dairy production, brewery, fish and animal farming, plant breeding and genomics, inner and outer water quality control, are now available to FC characterization and manipulation, and more and more are fast developing. The First International Workshop on Exotic Flow Cytometry will focus on FC applications other than bio-medical, with the aim to highlight the different fields where flow cytometry is giving a significant contribution, in terms of new components revealed and/or development of new methods of analysis. A wide overview of the use of FC in food and environment microbiology, plant and animal biotech, green biotechnology and genomics will be offered, as also related to the complex quality control systems of the agri-food supply chain, in the framework of the European METROFOOD-Research Infrastructure.

The workshop will be organized during three days (www.citometriagic.it - The Italian Society of Cytometry GIC)

- DAY 1 Food quality and environmental microbiology
- DAY 2 Plant and animal cytometry and biotech
- DAY 3 Hands-on day for a maximum 30 persons. A limited number of participants will also get a chance to analyze their samples

Registration (www.italymeeting.it)

- Workshop Fees: early birds fees till September 30th 2019
- Conference only: 250,00€ (early registration 200,00€ plus VAT 22%)
- Conference + hands-on day: 350,00€ (early registration 250,00€ plus VAT 22%) (link)

Early Registration Extended
Till October 31st, 2019

....!

Cancellation Policy (www.italymeeting.it)

- Cancellations should be made in writing, within 15th October 2019
- Will receive a full refund, except 50,00€ (plus VAT 22%) for administrative fee
- Refunds will be made in the second week after the conference end, by bank transfer and all bank charges will be for the registrants account
- Cancellations received after this cut-off time will no longer be eligible for refund

Call for Abstract & Poster Format (www.italymeeting.it)

- Posters will be selected by the scientific committee and the abstract will be published in the workshop report
- Poster submission: first deadline 30th September 2019
- Guidelines for Poster: size A0 - 841 x 1189 mm vertical (see link)

Instruction for sponsorship (enquire for availability)

We can offer different sponsorship options, such as:

1. your logo and technicals into the workshop bag (you might wish to provide one)
2. a desk with your people, technical papers, presentation and so on
3. a desk with your demo instrumentations at the workshop and/or at the hands-on day
4. a 15min presentation about your instruments applied to sounding cases

Enquires to:
